REMARKS:

A high-frequency broadcasting station is located 4.5 nautical miles northeast of Kuybyshev, USSR, at 53°15'N/50°14'E. The station (see accompanying photograph) is composed of 4 transmitter buildings, 4 cooling ponds, 2 probable cooling ponds, a housing and support area, at least 42 self-supporting lattice towers from 100 to 315 feet high, and numerous stick masts. The station is served by an all-weather road and has access to power from an existing line in the southeast corner of the station. The only security noted is a fence partially constructed around the area. This station is similar in function to stations at Alma-Ata, Komsomolsk, Novosibirsk, Stalinabad, Tashkent, and Tbilisi.
